- Proficient in organizational and time-management abilities
- Outstanding communication and interpersonal skills
- Capable of working autonomously and collaboratively
- Attentive to details and adept at managing multiple tasks concurrently
- Proficient in RS & Clinic Systems development and management
- Skilled in pinpointing growth prospects and creating strategic plans in line with business goals
- Experienced in implementing and overseeing ERP systems
- Effective Team Leadership and Communication: Demonstrated skill in leading development teams, guiding junior programmers, and explaining technical concepts to non-technical stakeholders to ensure clear comprehension and cooperation

## PROGRAMMING:

- Javascript ( React, Nodejs, Express etc).
- PHP ( Laravel, CI, Yii2).
- .Net ( MVC)
- Python ( Odoo)
- Mobile ( React Native, Flutter)

## PROFESSIONAL EXPERIENCE

### Software Engineer

Control System Arena Paranausa | 2023 - Present

- Designed, developed, and maintained software solutions for internal and client-facing applications.
- Developed a secure file sharing system using AWS S3 Storage for Pertamina PHONWJ.
- Created a service to integrate with Principal App Terminal Manager for efficient order and contract creation.
- Managed a robust contract management system.
- Developed a web application for OPC Historical Data Access (HDA).
- Collaborated with cross-functional teams to gather requirements and deliver high-quality software products.

### Lead Programmer

Kartika Bina Medikatama | 2017 - 2023

- Led a team of programmers in developing and maintaining internal applications, ensuring high-quality code and timely delivery.
- Managed project timelines, delegated tasks, and offered technical guidance to junior team members.
- Worked closely with stakeholders to gather requirements and translate them into technical specifications.
  - Notable Projects:
    - HRIS: Enhanced HR operations by creating a system for employee information, attendance, and payroll management.
    - SAP Integration: Automated business processes by integrating with SAP for seamless data flow.
    - Helpline System: Established a system for effective customer support and issue resolution.
    - Insurance System: Developed a platform for managing insurance policies, claims, and customer data.
    - Courier System: Streamlined logistics and delivery operations with a new management system.
    - Medical Checkup System: Created a system for organizing and scheduling employee medical checkups.
    - WhatsApp Notification System: Integrated WhatsApp API for automated internal process notifications.
    - COVID-19 App: Developed an application to monitor and manage employee health status and COVID-19 protocols.
